

## WHO WE ARE AND WHAT WE DO

### We are perfectionists.

Doing the job right is what we do best. Perfection is our goal.

Electro Medical Systems (EMS) was founded more than 25 years ago in Switzerland's Vallée de Joux.

For more than 200 years this area north of Geneva has manufactured micromechanical masterpieces of world acclaim. Renowned brands such as Breguet, Blancpain, Audemars Piguet and Jaeger-LeCoultre – one of our development partners – have forged the reputation of Swiss precision and craftsmanship.

EMS continues this tradition in a spirit of relentless innovation nurtured by an impeccable track record of success. From our corporate headquarters in Nyon on the shores of Lake Geneva, EMS looks towards the future with confidence.

Our wide range of medical precision equipment (orthopaedic, urological or dental prophylaxis instruments) benefits from a tradition of flawless Swiss quality ensured by over 300 skilled and specialized employees.

As a market leader EMS sets industrial standards by developing micromechanical devices of unequalled quality and crafted with Swiss precision; this is the result of our constant drive to perfection.

## WHO ARE WE LOOKING FOR

EMS is an innovative company constantly looking for talented people with exceptional drive, creativity and outstanding communication skills.

### We are searching for individuals who:

- are open-minded, flexible, dynamic, client and objective oriented;
- can act quickly and decisively, can adapt well to changing situations and who can make a real contribution in a team;
- have the energy to deliver.

At EMS, we recruit graduates from various fields of study: HES/EPF (mechanical engineering, micro-technique, electronic, pneumatic, fluidic, etc.), HEC, HES, ESCEA, etc. already having a practical experience through internships and/or work placement.

As an international company, our employees must be fluent in English, French and/or German (any other European language is an asset).

We also offer internships positions all year around in many of our functions.

For our internship positions (in principle min. 3 months), we are looking for students in their final two years of study.
